Compare for yourself.

You'll see that switching to Simply Potatoes® Refrigerated Mashed Potatoes just makes sense.

	X Scratch	K Frozen	X Dehydrated	SIMPLY POTATOES® X Refrigerated
TASTE	Can vary in taste both from raw inconsistency and back-of-house labor	 May compromise guest satisfaction Refrigerated mashed preferred almost 3 to 1 over frozen* 	• May contain artificial flavors try them against refrigerated and taste the difference in freshness	 Made from real potatoes & quality ingredients so they taste like scratch Never frozen or dehydrated
CONVENIENCE & SAVINGS	 Time and labor intensive it takes 5X longer to prepare mashed potatoes from scratch compared to refrigerated** Scratch mashed can have a 20% yield loss** 	 Many culinary applications require product to be slacked out before use 	 Rehydrating dehydrated products is time consuming and messy 	 Arrive prepared and ready-to heat - no cleaning, peeling or mashing Immediate usability in any culinary application No waste
PERFORMANCE & SAFTEY	 Raw supply can change frequently Kitchen staff can injure themselves while peeling and cutting Can carry pathogens that can be spread throughout the kitchen 	• Freezing potatoes breaks down the natural starch structure which can lead to poor consistency and excess water	 Hurried staff and rehydrating errors can lead to product variation and even make product unusable 	 Consistent, high-quality product thanks to over 40 years our experts have spent perfecting the refrigerated process Prevents risk of injury from sharp knifes and reduces risk of crosscontamination from pathogens on raw potatoes

*Technomic Consumer Brand Metrics **MFI Internal Time-Yield Audit: boiling, peeling, cutting and mashing 50 lbs. of raw potatoes
